

Special Issue on Environmental Contamination and Ecological Health

Call for Papers

The environment plays a crucial role in people's physical, mental and social well-being. Despite significant improvements, major differences in environmental quality and human health remain between and within European countries. The complex relationships between environmental factors and human health, taking into account multiple pathways and interactions, should be seen in a broader spatial, socio-economic and cultural context. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of environmental contamination and ecological health.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **environmental contamination and ecological health**. In this special issue, potential topics include, but are not limited to:

- Health effects from noise
- Health effects from radiation
- Biodiversity destruction
- Climate change
- Health Risks and Ecological Restoration
- Environment pollution and health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue - Environmental Contamination and Ecological Health**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 31st, 2018
Publication Date	February 2019
