

Special Issue on Solid Waste Management and Disposal

Call for Papers

Solid waste refers to the solid and semi-solid waste materials that are produced in manufacturing practices, people's daily life and other activities. It will pollute the environment once being discarded directly. Solid waste can be divided into mining waste, industrial waste, urban living waste, agricultural waste and radioactive waste according to its source. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Solid Waste Management and Disposal**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Solid Waste Management and Disposal**. Potential topics include, but are not limited to:

- Solid waste handling and separation
- Sustainable solid waste management
- Transfer and transport
- Integrated solid waste management
- The processing of solid wastes
- Municipal solid waste
- Solid waste technology and management
- Urban solid wastes
- Recycling solid wastes

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - Solid Waste Management and Disposal**" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 12th, 2020
Publication Date	January 2021

Guest Editor:

Scientific Research
Open Access

Journal of
Environmental Protection
ISSN Online: 2152-2219
