

Special Issue on Monitoring and Assessment of

Environment

Call for Papers

Environmental monitoring refers to the determination of environmental quality (or pollution degree) and its changing trend through the measurement of representative values of factors affecting environmental quality. Understanding the environmental level and conducting environmental monitoring are the prerequisites for all environmental work. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Monitoring and Assessment of Environment**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Monitoring and Assessment of Environment**. Potential topics include, but are not limited to:

- Air monitoring
- Water monitoring
- Waste monitoring
- Enterprise monitoring
- Noise monitoring and control
- Ecological environment monitoring
- Environmental quality monitoring
- Pollution source monitoring
- Environmental monitoring technology
- Environmental risk assessment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Monitoring and Assessment of Environment**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 14th, 2021
Publication Date	November 2021
