Special Issue on Cost–Benefit Analysis

Call for Papers

Cost–benefit analysis (CBA), is a systematic approach to estimate the strengths and weaknesses of alternatives (for example in transactions, activities, functional business requirements or projects investments); it is used to determine options that provide the best approach to achieve benefits while preserving savings. The CBA is also defined as a systematic process for calculating and comparing benefits and costs of a decision, policy (with particular regard to government policy) or (in general) project .

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **cost–benefit analysis**. Potential topics include, but are not limited to:

- Cost–utility analysis and risk–benefit analysis
- Sensitivity analysis
- Cost estimates, investment decisions and policy design
- Capital and cost management
- Cost and profit efficiency
- Cost savings
- Cost Monte Carlo simulation
- Mathematical model and cost estimation
- Statistical method and cost-effectiveness analysis

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Cost–Benefit Analysis***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 12th, 2018
Publication Date	November 2018
