Special Issue on Actuarial Science and Finance

Call for Papers

Actuarial science is a discipline that assesses financial risk in the various economic activities using mathematical, financial and statistical methods. It is the basis for modern insurance, finance and investment to achieve sound operation. Actuarial science applies probability theory and mathematical statistics to define, analyze and solve the financial implications of uncertain future events. Such as pensions, insurance, savings and investment, economics, business, and finance.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **actuarial science and finance**. Potential topics include, but are not limited to:

- Risk management
- Insurance economics
- Investment and asset assessment
- Actuarial mathematics
- Derivative valuation
- Actuarial models
- Applications

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Actuarial Science and Finance***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 30th, 2019
Publication Date	October 2019
