

Special Issue on Gravitation, Astrophysics and Cosmology

Call for Papers

Gravitation, Astrophysics and Cosmology is the branch of astronomy that deals with the physics of the universe, including the physical properties of celestial objects, as well as their interactions and behavior. Astrophysics is the study of celestial objects such as galaxies, stars, black holes, planets, exoplanets, the Big Bang, dark matter, and dark energy. The study of cosmology is theoretical astrophysics at scales much larger than the size of particular gravitationally-bound objects in the universe. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **gravitation, astrophysics and cosmology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **gravitation, astrophysics and cosmology**. In this special issue, potential topics include, but are not limited to:

- Application of Einstein's theory of general relativity theory
- Clusters, Big Bang nucleosynthesis
- Extragalactic astronomy, the early universe
- Dark matter and dark energy
- Astrophysics
- Physical cosmology
- Religious, mythological, and metaphysical cosmology
- Newton's universal gravitation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Gravitation, Astrophysics and Cosmology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	October 26th, 2017
Publication Date	December 2017
