

Special Issue on Quantum Physics

Call for Papers

Quantum mechanics is the study of the dynamics of particles at its most fundamental level. The state of a particle, such as its position or momentum, is described by a statistical distribution given by its wavefunction. As this name suggests, this formalism gives matter many properties that are classically associated with waves. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Quantum Physics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Quantum Physics**. In this special issue, potential topics include, but are not limited to:

- Quantum optics; Quantum electronics
- Quantum theory
- Quantum numbers and orbitals
- Quantum computing
- Interpretation of quantum mechanics
- Quantum measurement
- Quantum condensed matter
- Quantum gravity
- Single photons and quantum effects

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Quantum Physics and Its Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 30th, 2021
Publication Date	September 2021
