

## Special Issue on Applied Physics

### Call for Papers

Applied Physics is a branch of physics that focuses on the practical application of physical principles and theories to solve real-world problems. It involves the study of various phenomena and their applications in fields such as engineering, technology, medicine, and the environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Applied Physics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Applied Physics**. In this special issue, potential topics include, but are not limited to:

- Nanostructures, Nanomaterials
- Magnetic materials
- Atmospheric physics
- Plasma physics
- Engineering physics
- Materials physics
- Quantum technology
- Photonics and optoelectronics
- Energy and environmental physics
- Biophysics and biomedical physics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Applied Physics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 15th, 2026
Publication Date	July 2026

#### Guest Editor:

Dr. Taha ETEM, Cankiri Karatekin University, Turkey.
