

Special Issue on Relativity Research

Call for Papers

Relativity research constitutes a major branch of theoretical and experimental physics dedicated to the investigation of Einstein's theories of Special Relativity and General Relativity, which fundamentally redefine the nature of spacetime, gravitation, and the relationship between matter and geometry. Alongside quantum mechanics, relativity forms one of the two pillars of modern physics. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Relativity Research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Relativity Research**. In this special issue, potential topics include, but are not limited to:

- Mathematical Foundations of General Relativity
- Black Hole Physics
- Gravitational Wave Astronomy
- Numerical Relativity
- Relativistic Astrophysics
- Quantum Field Theory in Curved Spacetime
- Quantum Gravity & Unified Theories

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Relativity Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 15th, 2026
Publication Date	September 2026
