

Special Issue on Plasma Physics

Call for Papers

Plasma physics is the study of charged particles and fluids interacting with self-consistent electric and magnetic fields. It is a basic research discipline that has many different areas of application — space and astrophysics, controlled fusion, accelerator physics and beam storage. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **plasma physics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **plasma physics**. In this special issue, potential topics include, but are not limited to:

- Properties and parameters
- Plasmas in space science and astronomy
- Plasma formation
- Stimulated scattering in laser produced plasmas
- Methods of describing plasma phenomena
- Complex plasma phenomena
- Mathematical descriptions
- Applications of plasma physics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Plasma Physics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 23rd, 2026
Publication Date	November 2026
