Special Issue on Condensed Matter Physics

Call for Papers

The field of condensed matter physics explores the macroscopic and microscopic properties of matter. Condensed Matter physicists study how matter arises from a large number of interacting atoms and electrons, and what physical properties it has as a result of these interactions. The condensed matter field is considered one of the largest and most versatile sub-fields of study in physics, primarily due to the diversity of topics and phenomena that are available to study. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **condensed matter physics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **condensed matter physics**. In this special issue, potential topics include, but are not limited to:

- Quantum properties of matter
- Theory of condensed matter physics
- Solid state electron theory
- Macroscopic quantum state
- Nanostructures and mesoscopic physics
- Soft matter physics
- Applications of condensed matter physics

Authors should read over the journal's Authors' Guidelines carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Condensed Matter Physics***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 28th, 2027
Publication Date	March 2027
