

Special Issue on Data Security & Data Encryption

Call for Papers

Data security means protecting data, such as a database, from destructive forces and from the unwanted actions of unauthorized users. Encryption is a process used to protect information in transit and storage, including sensitive data processed and stored through networks, the internet, and mobile and wireless systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Data Security & Data Encryption**. Potential topics include, but are not limited to:

- Data encryption
- Data security and privacy
- Cryptography
- Cybersecurity
- Computer security
- Privacy software
- Information technology
- Data security technologies
- Data security system and method
- Encryption algorithms

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Data Security & Data Encryption**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 26th, 2017
Publication Date	July 2017
