

## Special Issue on Transportation Planning and Management

### Call for Papers

Transport is central to our way of life. It is a vital aspect of local, national and global economic and business activity and a growing field of professional employment. Transportation planning and management is a multidisciplinary field. It adopts economic theories to assess transport infrastructure, uses quantitative traffic principles to forecast traffic conditions, and requires management skills for transport policy implementation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **transportation planning and management**. Potential topics include, but are not limited to:

- Design of effective transport
- Transport and infrastructure systems
- Modes of transport
- Strategic transport planning
- Sustainable transport
- Traffic and mobility management
- Public transport
- Software tools

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Transportation Planning and Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 28th, 2016
Publication Date	September 2016
