

Special Issue on

Transportation Technologies and Smart Cities

Call for Papers

With the urbanization and mega cities trend, the implementation of smart city technologies will be a critical challenge for government in both developed and developing regions. Tomorrow's smart cities will redefine sustainability, efficiently, conveniently and liveability. Transportation systems that are efficient, environmentally friendly and move quickly, comfortably and affordably to peoples' destinations will be a defining feature of many ecocities.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **transportation technologies and smart cities**. Potential topics include, but are not limited to:

- Transforming transportation
- Transportation management systems
- Multimodal transportation and traveler information systems
- Public transportation ticketing and mobile payments
- Intelligent transportation
- Autonomous vehicles
- City mobility and safety
- Smart city challenge

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Transportation Technologies and Smart Cities**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 20th, 2016
Publication Date	February 2017
