## Special Issue on Logistics System

### Call for Papers

Logistics is the management of the flow of things between the point of origin and the point of consumption in order to meet requirements of customers or corporations. The logistics of physical items usually involves the integration of information flow, material handling, production, packaging, inventory, transportation, warehousing, and security. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in area of **logistics system**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **logistics system**. Potential topics include, but are not limited to:

- Supply chain management
- Logistical systems design and optimization
- E-logistics and information systems
- Customer relationship management
- Warehouse management
- Transport management
- Distribution management
- Modelling and analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Logistics System**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 12th, 2017
Publication Date	December 2017

Scientific Research  
*Open Access*

Journal of Transportation  
Technologies

ISSN Online: 2160-0481
