Energy and Power Engineering **(EPE)**, a monthly journal, publishes research and review articles in all important aspects of electric power engineering and other professionals involved in the electric power industry. Both experimental and theoretical papers are acceptable provided they report important findings, novel insights, or useful techniques in these areas.

Associate Editors-in-Chief

Prof. Anjun Jin Ningbo University, China
Prof. Giulio Lorenzini University of Parma, Italy

Editorial Advisory Board

Prof. Ching-Chuen Chan The University of Hong Kong, China
Prof. Ryuichi Yokoyama Tokyo Metropolitan University, Japan
Prof. Xiaoxin Zhou Chinese Society of Electrical Engineering, China

Subject Coverage

EPE aims to strengthen relations between the energy sector, research laboratories, and universities. Additionally, accepted ones will immediately appear online followed by printed in hard copy. The topics to be covered by Energy and Power Engineering include, but are not limited to:

◆Analysis of Hybrid Generation Systems
◆Artificial Intelligence in Complex Power and Energy Systems
◆Bio-Energy
◆Building Energy Use and Energy Conservation
◆CO_2 and Emission Issues
◆CO_2 Capture and Storage
◆Conventional Energy Power Generation
◆Design and Dimensioning of Power Systems
◆Distributed Generation
◆Energy and Exergy Analyses
◆Energy Policies and Strategies
◆Energy Resources
◆Energy Resources Assessment
◆Energy Storage
◆Energy Sustainability
◆Gasification Processes and Technologies
◆Heat Exchanger
◆Hydrogen Energy and Fuel Cells
◆Impact of Climate Changes on Energy Systems
◆Integrating Renewable Energy to the Power Grid
◆International Experiences with Energy Infrastructures
◆Investment Planning for Energy Infrastructures
◆Organic and Inorganic Photovoltaics
◆Petroleum Engineering
◆Planning and Operations of Power Systems
◆Power Demand Forecasting and Management, Power Market
◆Power Electronic Engineering
◆Power Forecasting from Wind, Solar and Other Renewal Sources of Energy
◆Power System Protection
◆Power Transmission and Distribution
◆Reliability Evaluation and Risk Analysis of Power Systems
◆Renewable Energy Power Generation
◆Smart Grid
◆Socio-Economic and Power System Management
◆Solar Energy Engineering
◆Transmission and Capacity Planning
◆Waste Energy Management
◆Wind Energy Engineering

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the EPE.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is an open access academic publisher. It currently publishes more than 200 peer-reviewed open access journals covering a broad spectrum of academic disciplines. Through its open access publishing model, SCIRP is committed to supporting the global research community and promoting the dissemination, exchange, and application of scholarly knowledge.

What is Open Access?

SCIRP ensures that all original research papers it publishes are offered free and continuing online accessibility as soon as they are published. In order to deliver open access journals, SCIRP charges authors to cover operational expenses and subscription fees only for the printed version. Open access publishing allows for unrestricted and worldwide access to the complete text of research papers, and is thus most advantageous to the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
