

Special Issue on Research on Groundwater

Call for Papers

Groundwater is a key component of the hydrologic system. Groundwater is not only a vital water resource for human consumption but there are also intense exchange processes and interconnections with surface waters, terrestrial and aquatic ecosystems. The sustainable use and protection of groundwater resources requires intact ecosystems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **research on groundwater**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **research on groundwater**. In this special issue, potential topics include, but are not limited to:

- Interaction between groundwater and surface water
- Groundwater pollution
- Groundwater utilization
- Groundwater ecosystem
- Groundwater protection
- Groundwater analysis
- Groundwater quality
- Groundwater sustainability

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Research on Groundwater**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 25th, 2016
Publication Date	April 2016
