

## Special Issue on Research on Water Quality

### Monitoring and Management

#### Call for Papers

Water "quality" is defined as the physical, chemical, and biological condition of water as applied to a specific use. Freshwater is a finite resource as essential to agriculture and industry as it is to basic human existence. Water quality monitoring is a fundamental tool in the management of freshwater resources. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of research on water quality monitoring and management.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **research on water quality monitoring and management**. In this special issue, potential topics include, but are not limited to:

- Water quality detection
- Water quality analysis
- Water quality standards
- Drinking water quality
- Water management
- Water quality pollution
- Environmental water quality
- Water quality assessment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue - Research on Water Quality Monitoring and Management**" should be chosen during your submission.

Special Issue timetable:

Submission Deadline	May 12th, 2016
Publication Date	July 2016

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of**  
**Water Resource and Protection**  
ISSN Online: 1945-3108
