

Special Issue on Watershed Management

Call for Papers

Watershed management is an adaptive, comprehensive, integrated multi-resource management planning process that seeks to balance healthy ecological, economic, and cultural/social conditions within a watershed. Watershed management serves to integrate planning for land and water; it takes into account both ground and surface water flow, recognizing and planning for the interaction of water, plants, animals and human land use found within the physical boundaries of a watershed. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **watershed management**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **watershed management**. In this special issue, potential topics include, but are not limited to:

- Sources of pollution
- Watershed boundary
- Riparian zone
- Water distribution
- Watershed governance
- Water and chemical transport processes
- Watershed management model
- Watershed Management Process
- Watershed Plans
- Integrated water resources management

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Watershed Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 20th, 2018
Publication Date	February 2019

Guest Editor:

Scientific Research
Open Access

Journal of
Water Resource and Protection
ISSN Online: 1945-3108
