

Special Issue on
Water Quality Monitoring, Assessment and Management
Call for Papers

Water quality monitoring and assessment is a subject includes the fundamentals of water quality analysis, analytic determination of indicators in water environment monitoring, scheme making of water detection, pretreatment and collecting water samples and water quality monitoring report. Water quality management coordinates the relationship between social and economic development and water quality protection through the use of administrative, legal, economic and scientific and technological means. According to the report from *World Water Assessment Programme*, about two million tons of human waste is disposed into water courses every day. From oil spills and radiation leaks to floods and mass erosion, water quality monitoring, assessment and management has become an essential method for water pollution prevention and water resource protection.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **water quality monitoring, assessment and management**. Potential topics include, but are not limited to:

- Water quality monitoring
- Water quality standards
- Water quality analysis
- Water quality detection
- Water quality pollution
- Water quality assessment
- Water quality management
- Remote sensing monitoring technology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Water Quality Monitoring and Assessment**” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|------------------|
| Submission Deadline | March 26th, 2019 |
| Publication Date | May 2019 |
