

Special Issue on Wastewater Treatment and Water

Purification

Call for Papers

Wastewater treatment is to use physical, chemical and biological methods to treat wastewater, so as to purify wastewater, reduce pollution and achieve wastewater recycling. Sewage treatment is widely used in construction, agriculture, transportation, energy, petrochemical, environmental protection, urban landscape, medical catering and other fields. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Wastewater Treatment and Water Purification**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Wastewater Treatment and Water Purification**. Potential topics include, but are not limited to:

- Biological wastewater treatment
- Sewage treatment, disposal, and reuse
- Water purification and quality
- Evaluated water purification technology
- Industrial wastewater treatment technology
- Wastewater reuse for aquaculture, agriculture and industry
- Natural groundwater chemistry
- Wastewater reclamation
- Water softening

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Wastewater Treatment and Water Purification**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 28th, 2020
Publication Date	September 2020
