

Special Issue on Water Resources Planning & Management

Call for Papers

Water resource management refers to the process of regulating water quantity and quality in all the aspects of water resource utilization. Water resource management also needs to manage water-related risks, including floods, droughts and floods. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Water Resources Planning & Management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water Resources Planning & Management**. Potential topics include, but are not limited to:

- Water resources development and utilization
- Water resources assessment and modelling
- Sustainable water and energy use
- Watershed management
- Agricultural water management
- Water rights regulation and planning
- Water resources information and technology management
- Water supply and demand management
- Planning and design of water resource systems
- Water resources and economics
- Water resources protection and disaster prevention planning

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water Resources Planning & Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 5th, 2021
Publication Date	March 2021
