

Special Issue on Groundwater and Sustainable

Development

Call for Papers

Groundwater is stored in tiny gaps between rocks, sand, soil and soil gravel. It accounts for nearly 95% of the country's freshwater resources. Therefore, the sustainable development of groundwater is a hot issue of research. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Groundwater and Sustainable Development**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Groundwater and Sustainable Development**. Potential topics include, but are not limited to:

- Groundwater contamination and protection
- Groundwater treatment and remediation
- Groundwater quality and food safety
- Groundwater vulnerability and risk assessment
- Impact of climate change on groundwater
- Social aspects of groundwater
- Epidemiology and public health impacts of groundwater contamination
- Sustainable groundwater resources management
- Hydrogeological systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - Groundwater and Sustainable Development**" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 3rd, 2021
Publication Date	July 2021
