## Special Issue on Monetary Economics and Finance

### Call for Papers

**Monetary Economics and Finance** examines how money, financial markets, and monetary policy influence economic activity. It studies the behavior of central banks, interest rates, inflation, credit creation, and financial institutions, as well as the transmission of monetary policy to the real economy. The field also analyzes financial stability, asset pricing, banking systems, and the interactions between macroeconomic conditions and financial markets, providing insights for effective policy design and economic risk management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Monetary Economics and Finance**. Potential topics include, but are not limited to:

- Monetary policy analysis
- Monetary theory and economic growth
- Macroeconomics and monetary policy
- Monetary policy and public finance
- Central banking and financial regulation
- Banking and credit markets
- Inflation dynamics and price stability
- Interest rate theory and dynamics
- Financial markets and asset pricing
