Journal of Materials Science and Chemical Engineering is an international journal dedicated to the latest advancement of materials science and chemical engineering. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of materials science and chemical engineering. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Generally, accepted papers will appear online within 3 weeks followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Biomaterials and Biotechnology
- Carbon Nanomaterials
- Catalysis and Reaction Engineering
- Chemical Engineering
- Chemical Synthesis
- Composite Materials
- Extractive Metallurgy
- Fabrication of Nanomaterials
- Functional Material
- Inkjet Printing of Functional Materials
- Masonry Structures
- Metals and Alloys
- Microstructured Materials
- Modelling and Simulation in Structural Engineering
- Nanomaterials
- Nanotechnology and Nanoscience
- Polymer Processing
- Separation Science and Technology

We are also interested in: 1) Short Reports–2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews–Comments and critiques.
