

Special Issue on Electronic and Photonic Materials

Call for Papers

Electronic and Photonic Materials research is a multifaceted field that focuses on the study, design, synthesis, and application of materials that exhibit unique electronic and photonic properties. This interdisciplinary area bridges the gap between physics, chemistry, materials science, and engineering, aiming to develop new materials that can revolutionize electronic devices, optical communications, energy harvesting and storage systems, as well as numerous other technological applications. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Electronic and Photonic Materials**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Electronic and Photonic Materials**. In this special issue, potential topics include, but are not limited to:

- Semiconductor Materials
- Optoelectronic Materials
- Photonic Crystals and Metamaterials
- Quantum Materials
- Energy Materials
- Nanomaterials and Nanostructures

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – *Electronic and Photonic Materials***” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 28th, 2026
Publication Date	July 2026

Guest Editor:

Dr. Yuanhao Miao, Guangdong Greater Bay Area Institute of Integrated Circuit and System, Guangzhou 510535, China.
