

Special Issue on Earth and Environment Sciences

Call for Papers

We intend to invite front-line researchers and authors to submit original research and review articles on exploring "**Earth and Environmental Science**" for this special issue. The goal will be to cover various topics in earth sciences and environmental sciences that have prime importance in saving the planet from extinction. To be precise, advanced applications of geosciences in geo-engineering, petroleum geology, exploration geology, carbon sequestration and environmental geology will be included.

In this special issue, potential topics include, but are not limited to:

- Non-renewable energy sources
- Hydrocarbon exploration
- Coal extraction/coal mining
- Fossil fuel conservation
- Metal extraction from ore deposits
- Mineral deposits
- Global Energy crisis
- Global Warming and Climate Change
- Natural Disasters I: weather related (hurricanes, tornadoes, drought, etc.)
- Natural Disasters II: earth processes related (earthquakes, volcanoes, etc.)
- Environmental pollution
- Groundwater contamination
- Carbon sequestration
- Saving the ecosystem

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue - Earth and Environmental Science**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 21st, 2013
Publication Date	December 2013
