Special Issue on Astronomy & Space Sciences

Call for Papers

Astronomy is one of the oldest branches of science, fascinating humans from the earliest times. Using telescopes and satellites to observe the skies, as well as theoretical and simulation work, astronomers study how the Universe began and evolved to its present state, how galaxies form and why our solar system looks as it does. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Astronomy & Space Sciences**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Astronomy & Space Sciences**. In this special issue, potential topics include, but are not limited to:

- Space astronomy
- Observational astronomy
- Space weather; planetary sciences
- Spacecraft control; spacecraft navigation
- Space technologies
- Space environment
- Astrophysical cosmology
- Extragalactic astronomy and solar physics

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Astronomy & Space Sciences***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 10th, 2027
Publication Date	March 2027
