Special Issue on Biomedicine and Health

Call for Papers

Biomedicine and Health is a highly interdisciplinary research domain that integrates life sciences, basic medicine, clinical medicine, engineering technology, data science and public health. It systematically investigates the physiological and pathological mechanisms of human life processes, deciphers the causal links between health status and disease onset, and translates fundamental discoveries into actionable diagnostic, therapeutic, preventive and health management solutions. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Biomedicine and Health**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Biomedicine and Health**. In this special issue, potential topics include, but are not limited to:

- Molecular and Genetic Biomedicine
- Digital Biomedicine and Health Informatics
- Biomedical Engineering and Medical Devices
- Pharmaceutical and Biomanufacturing Engineering
- Systems Biomedicine
- Immunology and Translational Medicine
- Public Health and Preventive Health Engineering
- Biomedical Materials and Bionic Sensing

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Biomedicine and Health***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 26th, 2027
Publication Date	April 2027
