Special Issue on Management Information Systems

Call for Papers

Management information system broadly refers to a computer-based system that provides managers with the tools to organize, evaluate and efficiently manage departments within an organization. In order to provide past, present and prediction information, a management information system can include software that helps in decision making, data resources such as databases, the hardware resources of a system, decision support systems, people management and project management applications, and any computerized processes that enable the department to run efficiently. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of management information systems.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **management information systems**. In this special issue, potential topics include, but are not limited to:

- Advantages of management information systems
- Enterprise applications
- Development of management information systems
- Decision support system
- Executive information systems

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Management Information Systems***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 27th, 2017
Publication Date	June 2017
