

Special Issue on Sustainable Forest Management

Call for Papers

Sustainable forest management ensures that forest resources are preserved to meet the needs of future generations. Learn about sustainable forest management and see examples of how it is put into practice. Sustainable forest management, also known as sustainable forestry, is the practice of regulating forest resources to meet the needs of society and industry while preserving the forest's health. Therefore, sustainable forest management is always looking to strike a balance between the demand for the forest's natural resources and the vitality of the forest. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of sustainable forest management.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **sustainable forest management**. In this special issue, potential topics include, but are not limited to:

- Forestry development
- Forest conservation
- Forestry plans
- Urban forestry
- Forest ecosystems
- Plant diseases and insect pests
- Sustainable forestry
- Forest principles
- Sustainable use of forests

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Sustainable Forest Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 24th, 2016
Publication Date	January 2017
