

## Special Issue on Marine Conservation

### Call for Papers

The health of the ocean and marine life are so often taken for granted and due to our increasing numbers and wasteful practices, the ocean appears to be as vulnerable to harm by human activities as any other environmental realm—and maybe even more so based on the severity and scale of the threats. The way we manage and use these resources is therefore of great importance.. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Marine Conservation**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Marine Conservation**. In this special issue, potential topics include, but are not limited to:

- Human impact on marine
- Extinct and endangered species
- Preserving vulnerable marine species
- Sustainable fisheries
- Marine biodiversity
- Habitat conservation
- Ocean pollution

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Marine Conservation**” should be selected during your Submission.

Special Issue timetable:

|                     |                     |
|---------------------|---------------------|
| Submission Deadline | November 15th, 2026 |
| Publication Date    | January 2027        |

#### Guest Editor:

Dr. Haiam Morsy Aboul-Ela, College of Fisheries and Aquaculture Technology, Egypt.
