

## Special Issue on Nursing Quality and Patient Safety

### Call for Papers

As the medical industry continues to emphasize patient satisfaction and positive care experiences, organization leaders must understand the role different clinicians play in achieving that end. For the amount of time they spend at the patient bedside, nurses are essential in the journey to better care quality and experiences. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Nursing Quality and Patient Safety**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Nursing Quality and Patient Safety**. In this special issue, potential topics include, but are not limited to:

- Nursing quality and safety management
- Observation and nursing of critically ill patients
- Neurosurgery nursing quality and patient safety management
- Nursing risk management
- Patient satisfaction with pain management
- Patient satisfaction with nursing care
- Patient satisfaction with medical information provided
- Patient safety resources

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Nursing Quality and Patient Safety**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 21st, 2026
Publication Date	August 2026

#### Guest Editor:

Dr. Dott.ssa Angela Prendin, Azienda Ospedale Università di Padova, Italy.
