Open Journal of Ophthalmology is a peer reviewed international journal dedicated to the latest advancement of Ophthalmology. The goal of this journal is to keep a record of the state-of-the-art research and to promote study, research and improvement within its various specialties.

All manuscripts submitted to OJOph must be previously unpublished and may not be considered for publication elsewhere at any time during OJOph's review period. Additionally, accepted ones will immediately appear online followed by printed in hard copy. Topics to be covered by this journal include, but are not limited to:

- Anterior Segment Surgery
- Cataract
- Cornea, Ocular Surface, and External Disease
- Glaucoma
- Medical Retina
- Neuro-Ophthalmology
- Ocular Oncology
- Oculocardiac Research
- Oculoplastics & Orbit Surgery
- Ophthalmic Pathology
- Pediatric Ophthalmology & Strabismus
- Refractive Surgery
- Uveitis & Immunology
- Veterinary Formal
- Vitreo-Retinal Surgery

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the OJOph.

What is SCIRP?

Scientific Research Publishing (SCIRP) is an open access academic publisher. It currently publishes more than 200 peer-reviewed open access journals covering a broad spectrum of academic disciplines. Through its open access publishing model, SCIRP is committed to supporting the global research community and promoting the dissemination, exchange, and application of scholarly knowledge.

What is Open Access?

SCIRP ensures that all original research papers it publishes are offered free and continuing online accessibility as soon as they are published. In order to deliver open access journals, SCIRP charges authors to cover operational expenses and subscription fees only for the printed version. Open access publishing allows for unrestricted and worldwide access to the complete text of research papers, and is thus most advantageous to the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
