

## Special Issue on Research on Urology

### Call for Papers

Urology, also known as genitourinary surgery, is a medicine that specializes in the urinary tract and male reproductive system for men and women. Both men and women, the urinary tract is closely related to the reproductive tract, and the two diseases often affect each other. Urology can further subdivide urology oncology, urinary calculi, dysuria, pediatric urology, sexual dysfunction, male infertility, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Research on Urology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Research on Urology**. Potential topics include, but are not limited to:

- Urinary infection
- Urologic oncology
- Andrology
- Urodynamics
- Reconstructive urology
- Urinary tract inflammation
- Female urology
- Urological techniques
- Urinary incontinence and stress incontinence
- Pediatric urology
- Urinary calculi
- Male sexual dysfunction and prostate disease

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Research on Urology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 10th, 2020
Publication Date	July 2020

**Guest Editor:**
