

Special Issue on Future Trend in Chinese Medicine

Call for Papers

Chinese medicine refers to traditional Chinese medicine, is the study of human physiology, pathology and disease diagnosis and prevention of such a discipline. Chinese medicine has carried the ancient disease experience and theoretical knowledge summarized by ancient Chinese people and guided by the ancient naive materialism and dialectics spontaneous thought. Through long-term medical practice, Chinese medicine gradually formed and developed into a system of medical theory.

Chinese medicine base on the overall concept and similar concept and choose pathology as the basis for the diagnosis and treatment. Thinking mode of Chinese medicine and modern science originated in Europe is incompatible, however, here have been many research papers about Chinese medicine published in the scientific journal, and tried to use the perspective of modern medicine to explain this ancient medicine in the treatment of some phenomena and mechanisms. More and more evidences have shown that Chinese medicine has unique advantages in the treatment of certain chronic diseases. With depth theoretical study of modern Chinese medicine, it is being accepted by more and more westerners and generally recognized by the medical profession.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore **Future Trend in Chinese Medicine**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).
