

Special Issue on Anxiolytic

Call for Papers

An anxiolytic is a drug or other intervention that inhibits anxiety. Together these categories of psychoactive compounds or interventions may be referred to as anxiotropic compounds. Anxiolytic medications have been used for the treatment of anxiety and its related psychological and physical symptoms and it shown to be useful in the treatment of anxiety disorders. As one of the most important research fields of human life, **anxiolytic** is of great attractions to researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **anxiolytic**. Potential topics include, but are not limited to:

- Types of anxiolytics
- Serotonergic antidepressants
- Side effects of anxiolytics
- Benzodiazepines
- Herbal treatments of anxiety
- Novel anxiolytics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Anxiolytic**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	August 14th, 2014
Publication Date	September 2014

Guest Editor:

Prof. **Seong S.Shim**

James A. Lovell Federal Health Care Center, Mental Health Department, USA
