

## Special Issue on Advances in Econometrics

### Call for Papers

Econometrics is the branch of economics concerned with the use of mathematics, statistical methods, and computer science to describe, model, prove, and predict economic theory and systems. There are many tools that are used in econometrics, among which linear regression is the most frequently used starting point for an analysis.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Advances in Econometrics**. Potential topics include, but are not limited to:

- Linear regression model
- Multiple regression analysis
- Time series analysis
- Microeconometrics
- Hypothesis testing
- Probability distribution
- Multicollinearity
- Heteroskedasticity

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Advances in Econometrics**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 30th, 2016
Publication Date	August 2016
