## Special Issue on Microeconomics

### Call for Papers

**Microeconomics** is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and allocate limited resources among alternative uses. Microeconomics shows conditions under which free markets lead to desirable allocations. It also analyzes market failure, where markets fail to produce efficient results.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **microeconomics**. Potential topics include, but are not limited to:

- Economic behavior of individuals
- Allocation of scarce resources
- Market mechanisms and structure
- Effects of economic policies
- Demand, supply, and equilibrium
- Utility maximization problem
- Measurement of elasticities
- Perfect and imperfect competition
- Game theory
- Labor economics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Microeconomics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 7th, 2018
Publication Date	August 2018
