

Special Issue on Financial Economics

Call for Papers

Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and corporate finance; the first being the perspective of providers of capital, i.e. investors, and the second of users of capital. It thus provides the theoretical underpinning for much of finance. "Financial Economics" is an academic discipline that examines the intersection of finance and economics. It primarily focuses on the allocation and management of financial resources in various economic systems. This field explores how individuals, organizations, and governments make decisions about saving, investing, and allocating their money to maximize their wealth and achieve their financial goals. The goal of financial economics is to provide insights and tools to help individuals, businesses, and policymakers make informed financial decisions, allocate resources efficiently, manage risk, and understand the functioning of financial systems. Additionally, it contributes to the development of financial theories and models that enhance our understanding of how financial markets operate and influence the broader economy.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Financial Economics**. Potential topics include, but are not limited to:

- Quantitative methods
- Financial modeling
- Mathematical finance
- Behavioral economics and finance
- General equilibrium model
- Investment analysis
- Asset pricing
- Financial markets and institutions
- Financial econometrics
- Portfolio theory and risk management
- International economics and finance
- Public finance
- Economics of money and banking
- Financial regulation and policy

-
- Corporate finance
 - Financial decision making

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Financial Economics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 19th, 2023
Publication Date	February 2024
