

Special Issue on Vehicle System Dynamics

Call for Papers

Vehicle system dynamics research on the dynamics of vehicles primarily to automobiles which based on classic mechanics. It is fundamental analysis of vehicle motion and conceptual design of mechanic subsystems. Safety is an important field which has been given top priority in developing vehicles, to insure that people should be able to travel safely and securely.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **vehicle system dynamics**. Potential topics include, but are not limited to:

- Vehicle mechanics and mobility
- Vehicle dynamics and control
- Tire/wheel dynamics
- Vehicle suspension system
- Vehicle safety system
- Vehicle performance
- Modeling and simulation of vehicle

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Vehicle System Dynamics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 15th, 2016
Publication Date	January 2017
