## Special Issue on Nondestructive Testing

### Call for Papers

**Nondestructive testing (NDT)** is a wide group of analysis techniques used in science and technology industry to evaluate the properties of a material, component or system without causing damage. The terms nondestructive examination (NDE), nondestructive inspection (NDI), and nondestructive evaluation (NDE) are also commonly used to describe this technology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **nondestructive testing**. Potential topics include, but are not limited to:

- Electromagnetic methods
- Acoustic emission nondestructive testing
- Eddy-current nondestructive testing
- Ultrasonic nondestructive testing
- Nondestructive testing of structures and joints
- Definition of fatigue cracks

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Nondestructive Testing**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 20th, 2018
Publication Date	April 2018
