

Special Issue on Circuits and Electronics Technology

Call for Papers

Circuits bring basic electronic devices like transistors to life by combining them to realize useful functionality. In the past, circuits existed in isolated locations; today, they are pervasive, existing in outer space, underground, all around us and within our bodies. With rapidly elevating scope and sophistication, integrated circuits and electronic systems face unprecedented challenges. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Circuits and Electronics Technology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Circuits and Electronics Technology**. In this special issue, potential topics include, but are not limited to:

- Integrated circuits & systems
- Analog/RF/Mixed-signal IC design
- Circuit theory and computer-aided circuit design
- Design of analogue, radio frequency
- Digital and optoelectronic circuits and systems
- The design of integrated circuits
- Applied electronics with a special emphasis electronic systems design and product development
- Nano-scale device simulations
- Digital circuits and systems modelling and design

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Circuits and Electronics Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 20th, 2023
Publication Date	January 2024

Guest Editor:

Scientific Research
Open Access

**World Journal of Engineering and
Technology**

ISSN Online: 2331-4249
